Proposed Community Technology Fund Guidelines

The Community Council of the NITC recommends that first priority for Community Technology Fund awards be given to projects which directly address the Council's action plan. The Council will determine the amount of funds necessary for projects before the NITC's November 15 meeting. Any remaining funds will be available for competitive grants. A competitive grant round would be announced in late November with a late January application deadline. The Council recommends that competitive grants be awarded only to projects which clearly address Council priorities. Specific guidelines would be issued with the announcement of a competitive grant round.
