

**Meeting Notes**  
**Nebraska Geospatial Data Sharing and Mapping Services Network Working Group.**  
**Eric Herbert's Notes from 3-6-07**

Shared Services Desired Functionality

1. Share/distribute data
  - A. Offer services/applications for those without technical knowledge instead of raw data
  - B. Download spatial, tabular, & metadata
  - C. Share existing & new map services
    - 1) Develop method for secure registration of new map services
  - D. Develop common web services
2. View & access data
  - A. Map based
  - B. Text/menu based
  - C. Browse data by categories
3. Metadata - key to sharing data & backbone for non-spatial search & browse
  - A. FGDC standards
  - B. Metalite
  - C. Romona – too basic for shared services, but okay for inventory

The above functionality will be developed for a secure sharing network.

Tasks:

1. Herbert, Schonlau, Langtry, Chalmers test geodatabase replication
2. Identify available tools & methods for achieving above functionality list during ESRI workshop
3. Zink, Simpson review comparable portals for existing design & functionality ideas

Next Meeting - Tuesday, May 8th 1:30 CALMIT
