

8-905. Data sharing.

It is critical that agencies that share information and systems learn as much as possible about the risks associated with the planned or current interconnection and the security controls that they can implement to mitigate those risks. It also is critical that they establish formally documented agreements regarding the management, operation and use of interconnections, as required. The agreement should be reviewed and approved by appropriate senior staff from each organization.

All agencies that share connectivity and information between the agency and the Office of the CIO are required to have a security program that meets this policy. The agency information security officer shall develop a system security plan that must be approved by the state information security officer. All agencies shall perform a security control assessment that identifies the adequacy of security controls and precautions for protecting state information. If the agency performs this assessment independent of the state information security officer, an approved and signed interconnection system agreement that describes the security controls and plans will be in place to protect state information.
