State Government Council Priorities

The sector priorities of the State Government Council of the Nebraska Information Technology Commission are to provide recommendations that support:

SGC-1 Implementing electronic government (e-government) to provide for a cost effective, efficient delivery of services while maintaining necessary security and confidentiality of non-public information;

SGC-2 Improving collaboration, both between agencies and with other stakeholders, in all areas of IT;

SGC-3 Providing a planning and implementation process for IT projects which avoids unnecessary delay and bureaucracy; and

SGC-4 Supporting improved training, education, and change management.

The State Gorenment Council Sector Priorities were approved at the June 29, 1999 NITC (Nebraska Information Technology Commission) meeting.

State Government Council
of the
Nebraska Information Technology Commission
