State of Nebraska's Webmaster Group
Charter

Purpose	Recommend policies and guidelines for internet and web-related technologies for state government agencies.
Sponsor	Steve Schafer, CIO
Scope/Boundaries	Promote interoperability of Internet and web-related technologies for state agency websites including portals, web online forms, web page designs, web page content, web authoring software, web browsers, web accessibility, web security and privacy and developing web standards and guidelines.
Desired Goals and Outcomes	**Educate** – Provide information and training to state government agencies, webmasters, and policy makers about web related issues. **Communicate** – Discussion of web-related issues of information, problems and solutions. To increase awareness of State of Nebraska's Webmaster Group. **Requirements** – Determine publication, authoring, and accessibility requirement of state government agencies based on state and federal laws of regulations. **Policies and Guidelines** – Prepare draft policies and guidelines, using the procedures outlined in Section 3 of the Statewide Technology Plan. **Coordinate** - Work with the State Records Board, the Accessibility Work Group, and any/all aspects of the State Government Council on web-related issues.
Authority	This group will: -Make recommendations to State Government Council regarding policies and guidelines for internet and web related technologies. -Identify problems and issues related to web technology and user interface.
Membership	Facilitator – Elected Chair and Co-Chair Any member of state agencies or educational institutions particularly web developers.
Reporting	The group will report to the State Government Council as needed. Agendas, meeting minutes are posted on the Webmaster Group's website.
